## ~~IMPLEMENTATION OF HAZARD ANALYSIS CRITICAL CONTROL POINT ...~~

The production of beer and spirits produces solutions of ethanol, which is a highly flammable liquid. Raw materials for fermentation and mashing processes involve the handling, storage, and milling of wheat and barley, which generate flammable dust, while grain roasting and drying require huge quantities of fuel, which is usually natural gas.

not using uni-tanks), dry hopping if any, aging, filtration, transfer to bottling, canning or kegging, then the actual packaging process along with primary containers and secondary containers.

## ~~Hazard Analysis for Beer Production Process - IFSQN~~

HACCP is recognised as a worldwide standard for food safety and purity acknowledged by regulatory bodies, trade organisations and retail groups. While it may not be required by law, any winery looking to remain competitive in today's global economy should strongly consider establishing such a system.
