Special illustrations:

The eighth edition includes many new illustrations and brain scans, particularly in the later chapters, to stimulate student interest and clarify important points. The illustrations in

Biopsychology were designed by Pinel and his artist/designer wife,

Online Library Biopsychology

Maggie; thus they are the perfect complement to Pinel's written words.

Pinel's Biopsychology is the core text for my first year as an e-learning psychology student. The text is very easy to follow and is written a less formal manner than some text books, which I find a welcome change. The many diagrams and theme tabs

are extremely useful,
especially on the
neuroanatomy module.
