The Ha Ha Bonk Book by Janet and Allan Ahlberg is jam-packed with brilliant jokes! This Young Puffin joke book is full of good jokes to tell your dad, mum, your baby brother, your teacher and anybody else you can think of, such as: What goes ha ha bonk? A man laughing his head off. and What goes 99 bonk? A centipede with a wooden leg and What goes putt, putt, putt, putt, putt, putt, putt, putt? A bad golfer and lots more besides. . . Allan Ahlberg - a former teacher, postman, plumber's mate and gravedigger - is in the super-league of children's writers with sales exceeding 17 million and library borrowings of 13 million. In collaboration with his late wife, Janet, he has published many enduring titles, among them Each Peach Pear Plum, Peepo!, Burglar Bill and The Jolly Postman. In addition he has written novels, collections of stories, sets of easy-readers and joke books.

The saddest part of me and Snap is that it came to its final chapter before we were ready to quit reading! But to my delight and now yours that issue has been solved with another masterpiece of writing in Bonk: Monsters & Miracles! Although this book is not a sequel, you will happily be reintroduced to some of the same characters and settings. That being said, Bonk stands on its own as storyteller Bruner skillfully intertwines today and yesterday in such a delightful manner that you scarcely notice that you've jumped from one century to another, then back again, with ease. Just as George Plimpton had his proverbial cup of coffee in the NFL as the un-recruited and certainly unwanted fourth-string quarterback for the Detroit Lions, so, too, did Will McGough immerse himself in a sport he had no business trying. Like Plimpton, whose football folly turned into the bestselling *Paper Lion*, travel and outdoor writer McGough writes of his participation in, around, and over the course of one of the world's premier triathlons, the annual 140.6-mile Ironman in Tempe, Arizona. McGough chronicles the Ironman's history, his unorthodox training, the pageantry of the race weekend, and his attempt to finish the epic event. The narrative follows not just his race but also explores the cult and habits of the triathlete community, beginning with the first Ironman competition in Hawaii in 1978. This is a light-hearted, self-deprecating, and at times hilarious look at one man's attempt to conquer the ultimate endurance sport, with a conclusion that will surprise and delight both dedicated triathletes as well as strangers to the sport.

chemicals at shuttered Fort McClellan in Alabama. Bonk, a licensed private investigator, draws attention to the real possibility that veterans, their families, and civilians once assigned to now-closed Fort McClellan (FMC), Alabama were subjected to hazardous environmental conditions to include chemical weapon material and toxic chemicals starting in the early 1950s and continuing through 1999 and beyond. "I want to attract the attention of the 535 members of the U.S. Congress," said Bonk, also a retired supervisory criminal investigator and former U.S. Army military police trainee who trained at FMC. I want them to be able to have a reason to move forward with a FMC health registry and work toward a presumption within the U.S. Department of Veterans Affairs that FMC veterans were adversely affected by exposure to dangerous contaminants." The sad reality according to Bonk is that, "because of latency, dosage, time, and risk factors, FMC veterans have to fight individually to attempt to prove an in- service event and the service connection with a nexus between the two. In most cases, they were unknowingly exposed to a plethora of contaminants, making any argument difficult to prove." Bonk establishes a timeline and meticulously traces the post's historical use of hazardous materials, such as chemical weapons material, ionizing radiation, pesticides, and heavy metals. Bonk bases his findings on data from public U.S. government reports, open source news articles, and multiple interviews with trainees and trainers stationed at FMC, which was comprised of almost 50,000 acres and originally home to the U.S. Army's Military Police and Chemical Schools. The reports often reveal ambiguity, uncertainty, speculation, and a total lack of due diligence when rendering conclusions and recommendations regarding contaminated parcels.

communication, this book also serves as a useful guide for nascent practitioners. Healthcare writing audiences are diversifying, from traditional physicians and patients to administrators in government and insurance groups as well as technical practitioners. Writing for these increasingly diverse healthcare audiences is the focus of this book, which has just enough theory to lay groundwork, plentiful examples to illustrate how theory is practiced, summaries that highlight key points, and realistic practice exercises. In addition to the emphasis on diverse audiences, the book stresses the importance of the writing process, from pre-writing to final editing. The book includes writing checklists for completeness and accuracy, and it incorporates many helpful real-world examples of healthcare documentation.

When it comes to their personal transportation, today's youth have shunned the large, heavy performance cars of their parents' generation and instead embraced what has become known as the "sport compact"--smaller, lightweight, modern sports cars of predominantly Japanese manufacture. These cars respond well to performance modifications due to their light weight and technology-laden, high-revving engines. And by far, the most sought-after and modified cars are the Hondas and Acuras of the mid-'80s to the present. An extremely popular method of improving vehicle performance is a process known as engine swapping. Engine swapping consists of removing a more powerful engine from a better-equipped or more modern vehicle and installing it into your
