Coronaviruses don't integrate into the human genome (other viruses do and that's interesting)

(#45) Cell Structure And Function Review

In cell division the centrosome splits and makes two, then they go to opposite sides of the nucleus and from each centrosome grows microtubules in a spindle.

Read PDF Cell Structure And

The spindle is responsible for separating replicated chromosomes into the two daughter cells Centriole: Ring of nine groups of fused microtubules. Three microtubules in each group.
