Explore Life Cycles! takes kids on an amazing journey, where they'll learn about the changes plants and animals experience throughout their lives. Kids ages 6-9 will discover what happens inside those magical cocoons to transform a caterpillar into a butterfly. They'll explore how frogs breathe underwater as tadpoles, then use lungs as an adult. Explore Life Cycles! will examine how plants and animals are born, develop, and live their lives. Activities range from creating edible life cycles of insects to making a mealworm nursery. Using an eye-catching combination of cartoons, fun facts, and exciting projects, Explore Life Cycles! will bring the mysteries of life right into kids' hands.

The Life Cycle of a Butterfly explains in simple terms the transformation from pupa to chrysalis to butterfly. Beautifully illustrated, the book also takes a close up look at the caterpillar, one of nature's eating machines\* and shows why monarchs fly 4,000 miles after metamorphosis.

Managing Online Learning is a comprehensive guide to planning and executing effective online learning programs. Featuring contributions from experienced professionals across operations in university and corporate settings, this all-in-one resource provides leaders and administrators with informed strategies for supporting learners' and instructors' evolving needs, implementing and evaluating pedagogically sound technologies, projecting revenue-generating models, and anticipating future scaling challenges. These highly applied chapters cover essential topics such as unit design, management of staff and finances, student engagement, user experience and interface, data analytics, and more.

How does an acorn grow into a tree? What does a baby sea horse eat? Discover the amazing stages of different life cycles and learn all about your favourite species with this stunning series. From plants and pets to exotic animals, readers will soon learn how different species are born, grow up and reproduce. Each book has amazing photographs, easy-to-understand text and discussion points for further learning.

Text and illustrations relate the growth of a small seed that survives the winter cold to become a beautiful spring flower. On board pages.

This stunning illustrated children's book takes an innovative look at the circle of life, including animals, dinosaurs, stars, volcanoes, and even YOU. Everything has a beginning and an end, but what happens in between? Follow the migration of zebra across the vast plains, meet penguins guarding their eggs on the ice, and watch butterflies emerge from their cocoons. Shoot back in time 4.5 billion years to see how planet Earth was formed and then leap into the future to see what happens when stars die. Discover a new life cycle every time you turn the page. You'll take a closer look at the life cycles of environments, too. Discover how a river forms and changes over time. Find out how a tree grows and all of the other life cycles it supports within it. See the amazing sculptures the ocean waves carve out of cliffs. Dive beneath the surface to see how coral reefs form, and what causes them to die. Follow the life cycles of weather—from the water cycle to ice ages, to give you a better grasp of the climate situation we find ourselves in now. From the single-celled amoeba to how the Earth formed, the life cycles in this ebook have been carefully chosen to give you an amazing overview of the universe, and how everything is intricately linked. Filled with facts to amaze your friends, stunning photography, and beautifully detailed illustrations by Sam Falconer, Life Cycles gets to grips with the essence of life itself.

Read and find out all about eggs -- and how baby chicks grow inside of them. Learn how chicks develop,how they get the food they need to grow, and how a mother hen helps keep them safe in this simple introduction to the life cycle of a baby chick.
