In the 21st century, one of the most noteworthy changes in the human rights debate relates to the increased recognition of the link between business and human rights. This book is an attempt to explore this relationship and also to look into the obligations of the state and transnational corporations in the promotion of human rights. Business and Human Rights discusses how globalization has affected individuals in the enjoyment of their human rights in relation to the activities of corporations. The book addresses what additional steps the states should take to protect against human rights abuses by business enterprises that are owned or controlled by the state. Moreover, it covers, in depth, the role and contribution of the United Nations in business and human rights. The book includes several real-life case studies to help the readers understand the topics discussed.

Methodological discussion has largely been neglected in human rights research, with legal scholars in particular tending to address research methods and methodological reflection implicitly rather than explicitly. This book advances thinking on human rights methodology, offering instruction and guidance on the methodological options for human rights research.

Over the past seven decades, human rights education has blossomed into a global movement. A field of scholarship that utilizes teaching and learning processes, human rights education addresses basic rights and broadens the respect for the dignity and freedom of all peoples. Since the founding of the United Nations and the adoption of the Universal Declaration of Human Rights in 1948, human rights education has worked toward ensuring that schools and non-formal educational spaces become sites of promise and equity. Bringing together the voices of leaders and researchers deeply engaged in understanding the politics and possibilities of human rights education as a field of inquiry, Monisha Bajaj's Human Rights Education shapes our understanding of the practices and processes of the discipline and demonstrates the ways in which it has evolved into a meaningful constellation of scholarship, policy, curricular reform, and pedagogy. Contributions by pioneers in the field, as well as emerging scholars, constitute this foundational textbook, which charts the field's rise, outlines its conceptual frameworks and models, and offers case studies from Africa, Asia, Latin America, Europe, the Middle East, and the United States. The volume analyzes how human rights education has been locally tailored to diverse contexts and looks at the tensions and triumphs of such efforts. Historicizing human rights education while offering concrete grounding for those who seek entry into this dynamic field of scholarship and practice, Human Rights Education is essential reading for students, educators, researchers, advocates, activists, practitioners, and policy makers. Contributors: Monisha Bajaj, Ben Cislaghi, Nancy Flowers, Melissa Leigh Gibson, Diane Gillespie, Carl A. Grant, Tracey Holland, Megan Jensen, Peter G. Kirchschlaeger, Gerald Mackie, J. Paul Martin, Sam Mejias, Chrissie Monaghan, Audrey Osler, Oren Pizmony-Levy, Susan Garnet Russell, Carol Anne Spreen, David Suárez, Felisa Tibbitts, Rachel Wahl, Chalank Yahya, Michalinos Zembylas.

This book is essential reading for students with Law, Politics and Sociology backgrounds who wish to understand more about the methods and ethics of conducting human rights research.

Human rights offer a vision of international justice that today's idealistic millions hold dear. Yet the very concept on which the movement is based became familiar only a few decades ago when it profoundly reshaped our hopes for an improved humanity. In this pioneering book, Samuel Moyn elevates that extraordinary transformation to center stage and asks what it reveals about the ideal's troubled present and uncertain future.

The Internet has created a formidable challenge for human rights law and practice worldwide. International scholarly and policy-oriented communities have so far established a consensus regarding only one main aspect – human rights in the internet are the same as offline. There are emerging and ongoing debates regarding not only the standards and methods to be used for achieving the “sameness” of rights online, but also whether “classical” human rights as we know them are contested by the online environment. The internet itself, in view of its cross-border nature and its ability to affect various areas of law, requires adopting an internationally oriented approach and a perspective strongly focused on social sciences. In particular, the rise of the internet, enhanced also by the influence of new technologies such as algorithms and intelligent artificial systems, has influenced individuals' civil, political and social rights not only in the digital world, but also in the atomic realm. As the coming of the internet calls into question well-established legal categories, a broader perspective than the domestic one is necessary to investigate this phenomenon. This book explores the main fundamental issues and practical dimensions related to the safeguarding of human rights in the internet, which are at the focus of current academic debates. It provides a comprehensive analysis with a forward-looking perspective of bringing order into the somewhat chaotic online dimension of human rights. It addresses the matter of private digital censorship, the apparent inefficiency of existing judicial systems to react to human rights violations online, the uncertainty of liability for online human rights violations, whether the concern with personal data protection overshadows multiple other human rights issues online and will be of value to those interested in human rights law and legal regulation of the internet.

Drawing on Roma community voices and expert research, this book provides a powerful tool to challenge conventional discourses and analyses on Romani identity, poverty and exclusion. Through the transformative vehicle of a ‘Social Europe’, this edited collection presents new concepts and strategies for framing social justice for Romani communities across Europe. The vast majority of Roma experience high levels of exclusion from the labour market and from social networks in society. This book maps out how the implementation of a new ‘Social Europe’ can offer innovative solutions to these intransigent dilemmas. This insightful and accessible text is vital reading for the policymaker, practitioner, academic and activist.

This text reflects on the effect of the development community's major shift in focus from market-based frameworks to a rights-based one. The contributors reflect on their experience with rights-based development activities.

The Global Citizenship Commission was convened, under the leadership of former British Prime Minister Gordon Brown and the auspices of NYU's Global Institute for Advanced Study, to re-examine the spirit and stirring words of The Universal Declaration of Human Rights. The result – this volume – offers a 21st-century commentary on the original document, furthering the work of human rights and illuminating the ideal of global citizenship. What does it mean for each of us to be members of a global community? Since 1948, the Declaration has stood as a beacon and a standard for a better world. Yet the work of making its ideals real is far from over. Hideous and systemic human rights abuses continue to be perpetrated at an alarming rate around the world. Too many people, particularly those in power, are hostile to human rights or indifferent to their claims. Meanwhile, our global interdependence deepens. Bringing together world leaders and thinkers in the fields of politics, ethics, and philosophy, the Commission set out to develop a common understanding of the meaning of global citizenship – one that arises from basic human rights and empowers every individual in the world. This landmark report affirms the Universal Declaration of Human Rights and seeks to renew the 1948 enterprise, and the very ideal of the human family, for our day and generation.
